Adding assessment templates from SIMS

Adding assessment templates to Class Charts

If you wish to include custom templates created in SIMS, templates will need to be added to a sub category called class-charts (with Wonde as the main category).

Main Category = Wonde Sub Category = class-charts

This quick start guide demonstrates how to create the required categories and add templates to them.

1. In SIMS net, navigate to Tools > Performance > Assessment > Category

Please note: Class Charts will only read aspects where data is present from the template.

Newly added templates will not appear in Class Charts until the next time Wonde extracts information from SIMS. Usually this takes place during weeknights.
